

## Grid Game

Write a sentence using parts from 1, 2, 3, 4 below in the boxes. For example:

*Beverly read a book behind the school yesterday.*

Don't show your sentence to your partner(s). Your partners will try to guess each part of your sentence by making new sentences using the boxes below. For example:

Student: "Dave met a friend near a lake yesterday."

This student guessed "yesterday" correctly, so you need to delete this part and tell your partner this was correct. When all of your parts are deleted, you are out of the game. Continue until everybody has guessed.
